DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species:

Species 1: Corresponding to claims 1-41 and 80-120.

Species 2: Corresponding to claims 42-52 and 121-131.

Species 3: Corresponding to claims 53-63 and 132-142.

Species 4: Corresponding to claims 64-68 and 143-147.

Species 5: Corresponding to claims 69-79 and 148-158.

The species are independent or distinct because, for example, species 2 requires “determining an initial parameter of the digitally-detected image based on the initial values”, species 3 requires “automatically providing an option for adjusting values of the one or more parameters of pixels”, species 4 requires “determining adjusted values of the parameters based on the comparing of the first and second initial values and on a comparison of the parameter corresponding to at least one of the first and second initial values and the desired image parameter” and species 5 requires “determining properties of a fill flash for providing adjusted values of luminance for at least some of the pixels of the digital image based on the comparison of the initial luminance contrast and the desired luminance contrast”.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, there are claims 6 and 85 that are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
